## GRAPHENE CERAMIC EXTERIOR PROTECTION

### **What is Sharkskin Apex<sup>®</sup> Ceramic Exterior Protection?**

Sharkskin Apex<sup>®</sup> Ceramic Exterior Protection is a premium professional grade advanced Graphene Ceramic coating intended for all exterior vehicle surfaces including painted panels, unpainted plastic, alloy wheels, glass, mirrors, matte/satin surfaces, film/vinyl wraps, and convertible soft tops.

### **What is Graphene Ceramic?**

- Ceramic coating enhances the shine of the vehicle, is resistant to wear, and protects the applied surface by repelling pollutants and contaminants.
- Graphene additives enhances the hardness and repellent qualities of the ceramic coating. It also makes the ceramic coating significantly more resistant to detergents, helping it retain its protective properties.

### **Benefits of Sharkskin Apex<sup>®</sup> Ceramic Exterior Protection**

- 2X higher graphene ceramic content compared to Sharkskin Plus<sup>®</sup> Exterior Protection resulting in higher effectiveness in repelling liquids and deeper shine.
- Full exterior coverage on all exterior surfaces of the vehicle except tires/underbody.
- Increased visibility on all glass panels and mirrors in rain and snow.
- Premium protection for all applied exterior surfaces of your vehicle.
